Respected Sir/Madam,

We are a group of 3 engineering students undergoing B.Tech in Mechanical engineering. Our Team **Spandana Weg** is committed to bring the change in the society and help the country in various challenging scenario through engineering innovations.

We have designed a new type of male urinal toilet which can be used in Public Places like in Bus stands, Govt. and Private offices, buildings and complexes wherever sanitation, cleanliness, and maintenance of such urinals are the problem to the working/maintenance bodies. We believe that our new design will help the government in executing its mission of Swach Bharat Abhiyaan.

### Our Design Benefits-

1. Cleaner and Bad Odour free toilets.
2. Water Saving Toilets.
3. Easy and Cheap to construct and maintain.

Recently we proposed a design of a new Railway Coach so as to increase the passenger carrying capacity of the coaches. We presented this idea to NITI Aayog . They liked the solution and further forwarded it to RDSO Lucknow and it's under discussion which is going to be implemented soon we believe. We have attached the proofs to prove our capability. We have 4 patents.

We request you to give us 10 minutes of your precious time in an appointment to give you a presentation showcasing our new solution design. We strongly believe that our new concept has the capacity to uplift the Cleanliness level of our country in a way like no other. As a citizen of this great nation, it's my duty to look after my country's welfare. I am a common man and I'm requesting the government of common man to help the common man of this nation in realizing the dream of Clean India.

Please give us a chance.

Thank you,

Sincerely yours,

**Team Spandana Weg**
